THE NEW YORK PRESIDENTIAL DEBATE

Nassau County

A pre-planned event worked in conjunction with Metropolitan Data and Salamander Representative, Mark McColman, on September 26, 2016.

On September 26th, 2016, Salamander Technologies and Metropolitan Data Solutions assisted the Nassau County Office of Emergency Management (OEM) with the Presidential Debate held in Nassau County, New York.

Preemptive measures were taken ensure the safety of attendees, as well as the safety of the individuals working and/or volunteering for the debate, as their safety was a particularly high-priority for the OEM. The ability to track and report the status of individuals through Salamander Technologies was vital to the success of their overall operational preparedness.
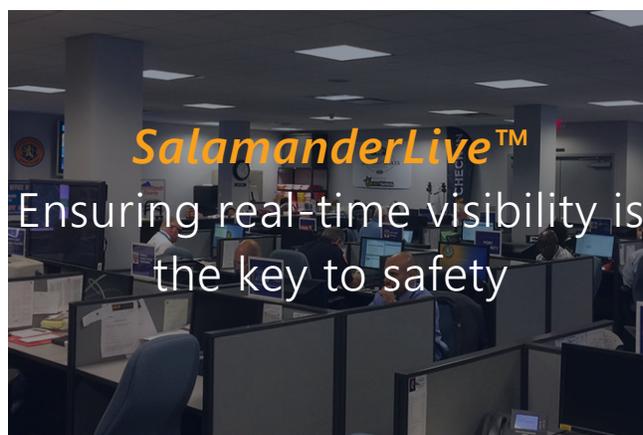

Solution

By using Salamander's Intelligent Accountability™ suite, the Nassau County OEM successfully tracked and reported 66 responders at their Emergency Operations Center. Solutions that were utilized included SalamanderLive™, RAPID TAG, COMMAND, 02 TRACK APP.

RAPID TAG stations were linked with COMMAND to give the EOC a full operational picture. First responders were credentialed on-site through RAPID TAG to produce event-specific ID cards. With the 02 TRACK APP, resources with RAPID TAG IDs were quickly scanned into their assignments and off-scene locations.

Outcome

By utilizing the Intelligent Accountability™ suite, Section Chiefs were able to instantaneously incorporate accurate data into their Incident Action Plan. In addition, Commanders maintained a complete operational picture of the event in real time from their web-based SalamanderLive™ dashboard.

SalamanderLive™
Ensuring real-time visibility is the key to safety

Salamander Technologies would like to thank Jonathan Friedfertig, Steven Pinzon, and John Dankowitz with Metropolitan Data Solutions for manning and setting up essential equipment at this high-profile event.

About Salamander

There are a number of organizations that fulfill only one of the three needs of reliable accountability during a high-profile event, such as a presidential debate. Today, there's limited situational visibility due to manual and reactive workflows in place. To gain order and control, it takes boots on the ground to assess the incident as well as resource identification.

Accountability is mandatory, and it is imperative that the Section Chief has visibility at all times. Life safety, incident accountability, command and control, and leadership liability make tracking who is on-scene, with what qualifications, when they arrive or depart, and where they are located of the utmost importance.

Salamander Technologies™ leads the pack by combining all three functions into one integrated solution, Intelligent Accountability™, that provides a real-time operational picture and visibility of jurisdiction resources to all stakeholders involved: TAG, TRACK and REPORT. Utilizing Intelligent Accountability makes sure you have the right people, in the right place, at the right time, with the right credentials for natural disasters, events and more.
